

INDEX TO VOLUME 141

ARCZEWSKI, K., Re-analysis of a class of mechanical systems by the method of structural numbers	(2)335
BEALE, D. G. and SCOTT, R. A., The stability and response of a flexible rod in a quick return mechanism	(2)277
BELEK, H. T. See MERMETAS, V.	(3)435
BELLÉS, P. M. See MAURIZI, M. J. (letter)	(2)359
CARNICER, R. See ERCOLI, L.	(2)221
CHIU, W. K. and NORTON, M. P., The receptivity of laminar boundary layer flow to leading edge vibrations	(1)143
DAVIES, P. O. A. L. and JIAJIN, G., Finite amplitude wave reflection at an open exhaust (letter)	(1)165
DEB, K. See WILSON, H.	(1) 55
DICKINSON, S. M. See KIM, C. S.	(2)291
DOIGE, A. G. See MUNJAL, M. L.	(2)323
ERCOLI, L., LAURA, P. A. A., GIL, R., CARNICER, R. and SANZI, H. C., Fundamental frequency of vibration of rectangular plates of discontinuously varying thickness with a free edge: analytical and experimental results	(2)221
FILIPICH, C. P. and ROSALES, M. B., Free flexural-torsional vibrations of a uniform spinning beam	(3)375
FRID, A., A modified Witrick-Williams algorithm for eigenvalue analysis of fluid vibration in piping systems (letter)	(2)355
FROMMHOLD, W. and MECHEL, F. P., Simplified methods to calculate the attenuation of silencers	(1)103
GEANNAKAKES, G. N. and WANG, P.-C., Moving load analysis of arbitrarily shaped plates using the B_3 -spline finite strip method	(1)127
GIL, R. See ERCOLI, L.	(2)221
GRIFFITHS, I. D. See RAW, G. J.	(1) 43
GÜRGÖZE, M., On the influence of parameter variation upon the eigenfrequencies of a mechanical system (letter)	(1)167
GUTIERREZ, R. H., LAURA, P. A. A. and ROSSI, R. E., Natural frequencies of a Timoshenko beam of non-uniform cross-section elastically restrained at one end and guided at the other (letter)	(1)174
HANSEN, C. H. See SNYDER, S. D.	(3)409
HOHENWARTER, D., Railway noise propagation models	(1) 17
HU, T.-F. and McLAUGHLIN, D. K., Flow and acoustic properties of low Reynolds number underexpanded supersonic jets	(3)485
JIAJIN, G. See DAVIES, P. O. A. L. (letter)	(1)165
JING, H.-S. and SHEU, K.-C., Exact stationary solutions of the random response of a single-degree-of-freedom vibro-impact system	(3)363
KATSIKADELIS, J. T., A boundary element solution to the vibration problem of plates	(2)313
KAWAI, Y. and TERAJ, T., A numerical method for the calculation of transient acoustic scattering from thin rigid plates	(1) 83
KAYRAN, A. and VINSON, J. R., Torsional vibrations of layered composite paraboloidal shells	(2)231
KIM, C. S. and DICKINSON, S. M., The free flexural vibration of right triangular isotropic and orthotropic plates	(2)291
KIM, D. H. and KOSS, L. L., Sound radiation from a circular duct with axial temperature gradients	(1) 1
KIM, K.-J. See SIM, S.	(1) 71
KOSS, L. L. See KIM, D. H.	(1) 1
LANGLEY, R. S., A derivation of the coupling loss factors used in statistical energy analysis	(2)207

- LAURA, P. A. A. See GUTIERREZ, R. H. (letter) (1)174
- LAURA, P. A. A. See ERCOLI, L. (2)221
- LEWIS, A. D. See ROGERS, R. J. (letter) (3)507
- LIN, Y. S. See LIU, T. S. (2)193
- LIU, T. S. and LIN, Y. S., Dynamic analysis of flexible linkages with lubricated joints (2)193
- LIU, W. K. See URAS, R. A. (3)389
- MAURIZI, M. J., ROSSI, R. E. and BELLÉS, P. M., Free vibrations of uniform Timoshenko beams with ends elastically restrained against rotation and translation (letter) (2)359
- MCLAUGHLIN, D. K. See HU, T.-F. (3)485
- MEAD, D. J. and YAMAN, Y., The harmonic response of uniform beams on multiple linear supports: a flexural wave analysis (3)465
- MECHEL, F. P. See FROMMHOLD, W. (1)103
- MERMERTAS, V. and BELEK, H. T., Static and dynamic stability of variable thickness annular plates (3)435
- MINAMIHARA, H., NISHIMURA, M., TAKAKUWA, Y. and OHTA, M., A method of detection of the correlation function and frequency power spectrum for random noise or vibration with amplitude limitation (3)425
- MUNJAL, M. L. and DOIGE, A. G., Theory of a two source-location method for direct experimental evaluation of the four-pole parameters of an aeroacoustic element (2)323
- NAGESWARA RAO, B. and VENKATESWARA RAO, G., Large-amplitude vibrations of free-free tapered beams (letter) (3)511
- NARAYANAN, S. and RAJU, G. V., Stochastic optimal control of non-stationary response of a single-degree-of-freedom vehicle model (3)449
- NATSIIVAS, S., Stability and bifurcation analysis for oscillators with motion limiting constraints (1) 97
- NIEZGODZKI, P. See SZEMPLIŃSKA-STUPNICKA, W. (2)181
- NISHIMURA, M. See MINAMIHARA, H. (3)425
- NORTON, M. P. See CHIU, W. K. (1)143
- OHTA, M. See MINAMIHARA, H. (3)425
- RAJU, G. V. See NARAYANAN, S. (3)449
- RASMUSSEN, K. B., Computer simulation of sound propagation over ground under the influence of atmospheric effects (letter) (2)347
- RAW, G. J. and GRIFFITHS, I. D., Subjective response to changes in road traffic noise: a model (1) 43
- ROSALES, M. B. See FILIPICH, C. P. (3)375
- ROGERS, R. J. and LEWIS, A. D., Further numerical studies of oblique elastic impact (letter) (3)507
- ROSSI, R. E. See GUTIERREZ, R. H. (letter) (1)174
- ROSSI, R. E. See MAURIZI, M. J. (letter) (2)359
- SANZI, H. C. See ERCOLI, L. (2)221
- SAVITHRI, S. and VARADAN, T. K., Free vibration and stability of cross-ply laminated plates (letter) (3)516
- SCOTT, R. A. See BEALE, D. G. (2)277
- SHEU, K.-C. See JING, H.-S. (3)363
- SIM, S. and KIM, K.-J., A method to determine the complex modulus and Poisson's ratio of viscoelastic materials for FEM applications (1) 71
- SNYDER, S. D. and HANSEN, C. H., The influence of transducer transfer functions and acoustic time delays on the implementation of the LMS algorithm in active noise control systems (3)409
- SZEMPLIŃSKA-STUPNICKA, W. and NIEZGODZKI, P., The approximate approach to chaos phenomena in oscillators having single equilibrium position (2)181
- TAKAKUWA, Y. See MINAMIHARA, H. (3)425
- TERAI, T. See KAWAI, Y. (1) 83
- URAS, R. A. and LIU, W. K., Dynamic buckling of liquid-filled shells under horizontal excitation (3)389
- VARADAN, T. K. See SAVITHRI, S. (letter) (3)516
- VENKATESWARA RAO, G. See NAGESWARA RAO, B. (letter) (3)511
- VINSON, J. R. See KAYRAN, A. (2)231
- VOKURKA, K., Amplitudes of free bubble oscillations in liquids (2)259

WANG, P.-C. See GEANNAKAKES, G. N.	(1)127
WILSON, H. and DEB, K., Evaluation of high order single-step integrators for structural response calculation	(1) 55
YAMAN, Y. See MEAD, D. J.	(3)465
YOKOYAMA, T., Vibrations of a hanging Timoshenko beam under gravity	(2)245
